Predictive Performance Scorecard

(Available only for Positions Benchmarked with the Bus Concept™ Predictor 3000 Benchmark)

Candidate: John Sample

Position Title/Company: Regional Vice President

The Goal: This predictive performance scorecard plots the Individual's Net Talents vs. the specific needs of this benchmarked position. The overall performance score is shown as a Level of Risk and Job Fit. Candidates scoring in the Low Risk/Strong Fit and Situational Risk/Good Fit candidates are recommended for pursuit; Real Risk/Poor Fit candidates are to be avoided, and Conditional Risk/Marginal Fit candidates are not recommended unless they have unique offsetting supporting credentials*.

<p>The NET TALENT Score is a revolutionary measurement that accurately measures the Strength of this individual's Management Abilities <u>IMPACTED</u> by their Performance Blockers.</p> <p>Just as NET PROFIT is the best predictor of a company's financial strength...Net Talent is a superior predictor of an individual's success.</p>	<p>The ACCESS Score is the ability of this individual to deliver their NET TALENT (Strengths impacted by Performance Blockers) vs. the selected Skills identified in the Specific Benchmark/Position Profile prepared for this <u>SPECIFIC JOB</u> environment.</p> <p>It is a unique measurement that has taken 30 years of research to calculate AND validate.</p>	<p>The ATTITUDE SCORE measures this individual's unique Focus or Personal Bias that influences their decisions.</p> <p>It is the ATTENTION (Positive or Negative) that adjusts or colors one's NET TALENT decision capacity. It is a powerful view of this individual's <u>bias pattern</u> that influences EVERY decision and/or judgment this individual makes.</p>	<p>The SKILL SCORE is a unique <u>INTEGRATED MEASUREMENT</u> of this individual's capacity to use their NET TALENT to effectively deal with the People, the Tasks, and the Structure in the External World.</p> <p>This measurement exposes the impact of the individual's unique balance of self esteem, role awareness, and self direction as each contributes to the overall quality of their decisions.</p>
---	---	--	--

Note: This predictive performance scorecard content should not be used as the sole source for decisions regarding hiring, placement, career moves or termination. It should be used along with your evaluation of their credentials (e.g. education, background, track record, and interviewing results developed for this specific person in light of this specific position.

"At A Glance" Performance Zone Overview

Here's an overview of the Performance Zone Management Factors that will WORK FOR YOU... and those that will WORK AGAINST YOU in the role of an effective Manager tasked with delivering results through other people.

ATTITUDES:

- Optimistic about self and world
- Optimistic, positive attitude toward others

PROBLEM SOLVING:

- Practical Problem Solver
- Good intuitive insights, 'gut instincts'
- Proactive thinking, focuses on consequences

SELF IMAGE:

- Persistent, consistent
- No fear of failure or success

MOTIVATORS:

- Results, getting things done
- Status, recognition
- Sense of mission, personal goals
- Sense of commitment to organization or team goals

Performance Zone Management Risk Graph

Critical Mgt.
Risk Scores è

Working with Others Managing Activities Problem Solving Planning & Organizing Getting Things Done Managing Self

Low Risk (Excellent ability to utilize the capacity and translate the talent into decisions; reduces the potential for errors and mistakes)	8.8 to 10.0 Low Risk
Situational Risk (Very good ability to utilize the capacity especially in well defined areas; however, there are specific situations that can interfere with the translation into decisions)	8.5 to 8.79 Situational
Conditional Risk (Limited access to the capacity indicating actual conditions that will increase the potential for mistakes and errors and restrict the transfer into decisions)	8.2 to 8.49 Conditional
Real Risk (Restricted access to the capacity indicating the ability is consistently unavailable and individuals are subject to mistakes and errors in judgment)	6.0 to 8.19 Real Risk

Critical Manager's Performance Zone Factors

A) Working With Others (Low Risk) — Measures the ability to see and appreciate the needs and interests of others and the ability to deal with others in a concerned but objective manner.
B) Managing Activities (Low Risk) — Measures the ability to see what is needed to get things done.
C) Problem Solving (Low Risk) — Measures the ability to identify potential problems and generate effective solutions.
D) Planning & Organizing (Low Risk) — Measures the ability to set goals, build plans, and translate them into action.
E) Getting Things Done (Low Risk) — Measures the ability of an individual to focus energy on tasks and follow them to completion, dealing with the stresses and strains without losing freedom of action.
F) Managing Self (Low Risk) — Measures the ability to see, understand, and be sensitive to personal uniqueness, confidence, competency, goals, and self organization.

35 Expanded Management Performance Zone Factors - Part A

The next two pages provide a powerful "Risk Level View" of this individual's **35 supporting management performance factors**. Thirty years of research confirms that access to these competencies and capacities plays an important role in the overall effectiveness and success of strong performing managers in the modern business model. 

The 4 Levels of Risk: Low = Strong Access, Situational = Good Access, Conditional = Marginal Access, Real = Poor Access to these supporting factors.

Supporting Performance Zone Factors	Low Risk (Strong Access to this Factor)	Situational Risk (Good Access to this Factor)	Conditional Risk (Marginal Access to this Factor)	Real Risk (Poor Access to this Factor)
Working With Others				
- Insight Into Others	ü			
- Attitude Toward Others	ü			
- Prejudice/Bias Index	ü			
- Sensitivity To Others	ü			
- Listening To Others	ü			
- Talking At The Right Time	ü			
Managing Activities				
- Meeting Established Standards	ü			
- Doing Things Right	ü			
- Attention To Policies & Procedures	ü			
- Meeting Schedules & Deadlines	ü			
- Attitude Toward Authority	ü			
- Attention To Concrete Detail	ü			
Problem Solving				
- Evaluating What To Do	ü			
- Using Common Sense	ü			
- Intuitive Insight	ü			
- Seeing Potential Problems	ü			
- Proactive, Conceptual Thinking	ü			

Continued on the next page.

35 Expanded Management Performance Zone Factors - Part B

This page continues the "Risk Level View" of this individual's 35 supporting management performance factors. Thirty years of research confirms that access to these competencies and capacities plays an important role in the overall effectiveness and success of strong performing managers in the modern business model.

The 4 Levels of Risk: Low = Strong Access, Situational = Good Access, Conditional = Marginal Access, Real = Poor Access to these supporting factors.

Supporting Performance Zone Factors	Low Risk (Strong Access to this Factor)	Situational Risk (Good Access to this Factor)	Conditional Risk (Marginal Access to this Factor)	Real Risk (Poor Access to this Factor)
Planning & Organizing				
- Realistic Goal Setting	ü			
- Short Range Planning	ü			
- Long Range Planning	ü			
- Concrete Organization	ü			
- Conceptual Organization	ü			
- Attention To Planning	ü			
Getting Things Done				
- Self Confidence	ü			
- Goal Directedness	ü			
- Results Oriented	ü			
- Ambition	ü			
- Persistence	ü			
- Consistency	ü			
Managing Self				
- Self Esteem	ü			
- Self Assessment	ü			
- Self Control	ü			
- Role Satisfaction	ü			
- Flexibility & Adaptability	ü			
- Health/Tension Index	ü			

***Note: The Health/Tension Index is a unique measurement that presents the risk of frustration and anxiety when one's thinking, alternatives, suggestions and ideas are not well received, do not fit or are rejected by one's peers and co-workers.**

Performance Zone "Net Talent" Inventory

Everyone has Natural Talents and Strengths as well as Weaknesses or Performance Blockers. This page presents the Critical "Net Talent" Ratio of this individual's Primary Strengths vs. their Primary Performance Blockers.

Like Net Profit... the Net Talent Measurement provides a bottom line performance prediction you can trust.

Prioritized Management Performance Strengths

(Deliverable Potential – Excellent, Very Good, Good, and Transition)

- 1) Health/Tension Index: (Managing Self) (MGT-35B)-**Excellent Potential**
Unique combination of clear personal identity and a sense of balance helps them see and accept successes and mistakes.
- 2) Persistence: (Getting Things Done) (MGT-28A)-**Excellent Potential**
Strong personal commitment to stay on track and complete goals and tasks regardless of what happens.
- 3) Self Assessment: (Managing Self) (MGT-31)-**Very Good Potential**
The ability to realistically see and understand how to utilize personal strengths in situations.
- 4) Flexibility, Adaptability: (Managing Self) (MGT-34A)-**Very Good Potential**
Strong personal commitment to what they believe is right combined with the ability to redirect energy when necessary.
- 5) Goal Directedness: (Getting Things Done) (MGT-25A)-**Very Good Potential**
Driven by a need to fulfill goals and plans generated primarily by personal ideals and ambitions.
- 6) Concrete Organization: (Planning And Organizing) (MGT-21A)-**Very Good Potential**
The ability and willingness to spend time and energy concretely organizing and planning.
- 7) Proactive, Conceptual Thinking: (Managing Problems) (MGT-17A)-**Very Good Potential**
Unconventional, individualistic thinking creates the ability for innovative, novel, and spontaneous problem solving.
- 8) Seeing Potential Problems: (Managing Problems) (MGT-16)-**Very Good Potential** 
Excellent capacity for identifying crucial issues in complex and confusing situations.
- 9) Using Common Sense: (Managing Problems) (MGT-14C)-**Very Good Potential**
Very Good focus and ability to see and understand how to get things done in a practical, common sense way.

Prioritized Management Performance Blockers

(Blocker Strength - Real, Conditional, Situational, and Low)

- 1) Meeting Established Standards: (Managing Activities) (MGT-7B)-**Low Risk**
Strong sense of perfectionism can lead them to impose an inflexibility without regard to consequences of the decision.
- 2) Realistic Goal Setting: (Planning and Organizing) (MGT-18A)-**Low Risk**
Perfectionistic, demanding and challenging thinking can lead you to set goals which are unrealistic or unrewarding.
- 3) Conceptual Organization: (Planning and Organizing) (MGT-22A)-**Low Risk**
Susceptibility to very stubborn and rigid thinking, especially as you seek to impose idealistic expectations on the world.

Top 10 "Net Talent" Management Performance Blockers

Everyone has Performance Blockers. This page provides a brief explanation of the performance cause and effect you can expect from these blockers for a candidate or ARE likely experiencing from an incumbent. Notice that the strength of the level of risk or interference is presented for each performance blocker.

Remember, that "NET TALENT" like Net Profit is the most reliable critical performance measurement. It is a sophisticated net calculation of the strengths of one's talents/capacities impacted by the strength of their interfering performance blockers. Just like Net Profit... Net Talent proves to be your best bottom line predictor for the level of PERFORMANCE you can expect from anyone for any specific management job.

Prioritized Management Performance Blockers

- 1) Meeting Established Standards: (Managing Activities) (MGT-7B)-Low Risk
Strong sense of perfectionism can lead them to impose an inflexibility without regard to consequences of the decision.
- 2) Realistic Goal Setting: (Planning and Organizing) (MGT-18A)-Low Risk
Perfectionistic, demanding and challenging thinking can lead you to set goals which are unrealistic or unrewarding.
- 3) Conceptual Organization: (Planning and Organizing) (MGT-22A)-Low Risk
Susceptibility to very stubborn and rigid thinking, especially as you seek to impose idealistic expectations on the world.
- 4) Sensitivity To Others: (Managing Others) (MGT-4A)-Low Risk
Excessive sensitivity to what others think or say potentially making it difficult to address tough issues.
- 5) Attitude Toward Authority: (Managing Activities) (MGT-11B)-Low Risk
Dogmatic, stubborn thinking can lead them to insist on conformity to rules, standards, and authority.
- 6) Attitude Toward Others: (Managing Others) (MGT-2A)-Low Risk
Too optimistic and involved, tends to become too personally involved, to expect too much from others.
- 7) Long Range Planning: (Planning And Organizing) (MGT-20A)-Low Risk
Perfectionistic, idealistic thinking can lead you to set and become committed to unrealistic long-term goals.
- 8) Results Oriented: (Getting Things Done) (MGT-26A)-Low Risk
Excessively now focused thinking can lead one to spend too much time on immediate needs overlooking consequences.
- 9) Role Satisfaction: (Managing Self) (MGT-33A)-Low Risk
Tend to be overconfident, to either expect too much from their role or too much from themselves.
- 10) Self Confidence: (Getting Things Done) (MGT-24J)-Low Risk
Surface confidence, may overlook own mistakes and become excessively concerned about status and image.

Performance Blocker Scoring Legend:

- | | |
|--|--|
| • Real Risk = Very Strong Interference | • Situational Risk = Marginal Interference |
| • Conditional Risk = Active Interference | • Low Risk = Very Low/Limited Interference |

Contact your Authorized Bus Concept™ distributor if you wish to view the expanded blocker explanations or learn more about the years of research and study that developed the Net Talent Concept and the critical role that the performance blockers play in this revolutionary predictive calculation.

Prioritized Performance Blocker Notes

This page provides you with insights into how each of the PRIMARY PRIORITIZED Performance Blockers is likely to impact this individual's overall performance. It begins with the strongest blocker, provides additional detail into how it manifests and how the interviewer can explore it in greater detail. Please remember that some internal (Managing Self) blockers may be the result of current situations (employment circumstances, market conditions, company struggles, personal tragedy etc. and may not be an ongoing issue. Other blockers (Real & Conditional Risk) are significant and should be carefully explored as they will be active for the individual.

1) Health/Tension Index: (Managing Self) (MGT-35B)-Situational Risk

They tend to have difficulty adapting when decisions and priorities do not match their expectations and to look for ways to get out of the stress even if they must make a mistake or refuse to take action.

2) Meeting Established Standards: (Managing Activities) (MGT-7B)-Low Risk

Their dogmatic, black and white thinking lead them to be impatient and frustrated when things do not work out as they expect. Test their willingness to be open to problems and solutions that do not fall on their radar screen.

3) Realistic Goal Setting: (Planning And Organizing) (MGT-18A)-Low Risk

Perfectionistic, idealistic thinking can lead to challenging but unrealistic goals, to frustration and inconsistency. Test their ability to set goals, schedules and timelines which are realistic and in touch with what needs to be done.

How the Human Business Brain Works

(OR...How Clearly can you think? What do you pay Attention to? & how Balanced are your decisions?)

The Bus Concept Performance Zone Technology is built upon the Nobel Peace Prize nominated research of Dr. Robert S. Hartman. This amazing work has been carried on by Wayne Carpenter who was one of Dr. Hartman's graduate students at the University of Tennessee. Wayne has spent 30 years scientifically expanding, validating, and translating Dr. Hartman's revolutionary discovery into modern business models. His tireless effort has validated the ability to precisely measure the individual human thinking patterns that drive all decisions and he has built that understanding into these reports. He confirms Dr. Hartman's contention that while all human beings Value Reality using the same 3 dimensional STRUCTURE OF VALUE We each adjust our valuation of reality using our own unique combination of the Clarity, Personal Bias, and Balance that we bring to the decisions we make. Thanks to Wayne's 30 year quest for excellence, this report offers you an accurate predictive performance scorecard based upon the precise measurement of the unique thinking pattern of any candidate or incumbent.

Our Success is directly tied to the QUANTITY AND THE QUALITY OF THE DECISIONS WE MAKE!

The Measurable Quantity and Quality Decision Making Components:

- Clarity – The measure of our ability to see and understand what is happening around us and to us. It is the capacity to be sensitive to the focus of each dimension.
- Bias – The measure of how we Filter or Color our Clarity view of each dimension.
- Balance – The measure of our ability to keep our judgment (Clarity & Bias) in a balanced perspective. It is the balanced capacity to make our decisions based upon the integrated clarity and bias input from each of the 3 dimensions.
- Integration- The relative overall balance between the 3 dimensional World View and the 3 dimensional Self View.

What makes it Unique and Why does it work?

Every action is first preceded by a DECISION to take that action. This technology scientifically measures the components of the decision making process translated into the net performance you can expect. The root cause of performance is of course, the CHOICES WE MAKE. Measure the quality and quantity of the choices...and measure the performance prediction with stunning reliability.

How to read the Superview Page (next page graphic)

Begin by noting the Clarity AND the Bias for EACH DIMENSION. The clarity scores run South to North (bottom to top) There are 5 levels of clarity: Crystal Clear, Clear, Clear Unconventional, Visible and Transition. Next, view the Bias for Each Dimension. Bias runs East and West and is the attention or coloration (positive or negative) that we apply to our clarity view of each dimension.

Always view each dimension in terms of Clarity AND Bias.

The clearer the clarity and the less the strength/influence of the personal bias, the better one is able to objectively SEE that view of reality (e.g. Crystal Clear Empathy with an Attentive bias enables superior understanding of others with a positive bias...while Transition Clarity with Inattentive negative bias is prone to mistakes in judgment about others and a feeling of suspicion toward them.

The Unconventional Level of Clarity

The Unconventional level of clarity measures your willingness to be inventive and novel. To see things in ways that others overlook because they think in habits and patterns that tend to look for what is familiar rather than what is inventive. Depending upon the needs of the specific job this can be a strong contributor or can cause problems if creative, innovative, and "out of the box" thinking is NOT desired.
